23. Aims of programme				
 To offer a high quality course, in which students are challenged by, and stimulated to challenge, accepted wisdom in all fields of veterinary science. Learn how to design experimental programmes appropriate for evaluating disease; to prepare and evaluate data; and to develop written and oral skills of communication. 				
24. Overall Programme Level Learning Outcomes - the programme offers opportunities for students to achieve and demonstrate the following learning outcomes. Learning outcomes should be specified for all intermediate awards as well as for the terminal award.				
Have developed the ability to access appropriate information, make methodical observations on the normal and abnormal functioning of biological systems, discriminate between important and relatively unimportant information and observations, reflect on information and observations, and solve problems, and discuss uncertainty in relation to scientific "facts", and balance different schools of thought.	Research Project			
 Develop important employability skills including: Communication, Teamwork, Personal management and career planning, effective learning, Problem- solving, digital literacy, numeracy. 	Across all modules, with particular emphasis in projects			
• Act with integrity, be honest, fair and compassionate in all their work. Maintain high ethical principles in relation to professional dealings, the use of information and experimentation in humans and animals.	Research Project			
25. Teaching/learning methods	Approximate total number of hours These figures may differ during the COVID-19 pandemic			
Personal tutorial/small group teaching	5-10 hours per week			
Medium-group teaching	5-10 hours per week			
Self-directed learning	Up to 10 hours per week			
26. Assessment methods	Percentage of total assessment load			
Coursework	15%			
Examination	35%			
Project	45%			
Presentations	5%			

27. Feedback

In each module, there are a number of formative feedback opportunities. These include written formative feedback on individual coursework, online quizzes with answers, group question and answer sessions, feedback to the group about exam and ICA performance, feedback to individual students about exam and ICA performance (in one-to-one tutorials). Students are encouraged to seek feedback from lecturers and tutors as needed during all small group learning and practical classes. Frequent opportunities for formative

feedback (oral and written) during investigative projects.

28. Programme structures and requirements, levels, modules, credits and awards
