9_educational improvements

9. How could we improve the podcasting service to make it a better educational tool for you?

Answer	Participant ID	Details	Group	Date	
Divide the audio file into chapters allowing for easy access to certain parts of the lecture, or embed the audio file into the slides themselves. this makes it easier to follow the lecture, as well as access only needed parts of the lecture. make it possible to playback audio at increased speed to shorten length of lecture	Anonymous			Jul 09 2007	
Create a feature whereby we can subscribe to lectures as podcasts, ex. on iTunes	Anonymous			Jul 09 2007	
...	Anonymous			Jul 09 2007	
record all lectures for future reference	Anonymous			Jul 09 2007	
sometimes it was hard to hear as the recorder was banging about on the lecturers chest, but really thats the equipments fault...dont know what youd do about it especially if the lecturer was walking around the room chapters in the recordings would be good too, so you could access a specific subject more easily, or pick up again where you left off	Anonymous			Jul 09 2007	
Make it quicker to download, and able to transfer to ipods	Anonymous			Jul 11 2007	
None.	Anonymous			Jul 17 2007	
make them easier to access on the intranet, i.e i had difficulty in playing the files. if it was easier then i would have made better use of them.	Anonymous			Jul 18 2007	
Make more of them, including videos to go along with it.	Anonymous			Jul 18 2007	
For me personally, I don't feel that any improvements could be made to the podcasting service. The only problems that I have experienced have been related to my own software and technical knowledge (or lack of it).	Anonymous			Jul 18 2007	
Come up with a way to synchronize the talking and the powerpoint, e.g. get lecturer to say which slide we are one	Anonymous			Jul 19 2007

The lecture recordings are a really useful tool as they are for clarifying points that were originally missed in the lecture due to having to take notes, etc. They complement the handout notes very well.	Anonymous			Jul 09 2007	
...	Anonymous			Jul 09 2007	
this is a massively good revision tool, especially for us kinesthetic/auditory learners, or if you're ill you don't have to stress about it!	Anonymous			Jul 09 2007	
I found this really useful, and I think it's a great idea, especially when I couldn't attend a lecture due to illness. I hope this continues next year.	Anonymous			Jul 11 2007	
Lecture recordings are very useful, particularly for the lectures from foreign lecturers, who are hard enough to understand in the first place, let alone keep up with them!! It would be more beneficial if all of the lectures were recorded.	Anonymous			Jul 17 2007	
Please definitely do it for next year - It helped me soooooo much and I don't think that I would do so well without it!	Anonymous			Jul 18 2007	
If all lecturers would agree to be recorded that would be great. If you are ill it's really useful to know that the lectures will be accessible when you're catching up.	Anonymous			Jul 19 2007
