GUIDELINES FOR PERIODIC REVIEW OF COURSES

Objective

The objectives of Periodic Review are to confirm:
• the continuing validity and relevance of the course;
• the continuing appropriateness of its academic standards;
• the continuing high quality of learning opportunities; and to consider the course team’s proposals and plans for the development of the course and the further enhancement of its quality.

The Expectation of the QAA UK Quality Code for Higher Education Chapter B8 is:

“Higher education providers, in discharging their responsibilities for setting and maintaining academic standards and assuring and enhancing the quality of learning opportunities, operate effective, regular and systematic processes for monitoring and for review.”

This procedure is designed to ensure that the College continues to meet the above Expectation.

Scope

Periodic Review applies to all courses including Professional Doctorates, with the exception of the MPhil/PhD. Periodic Review also includes programmes which run under the auspices of the University of London International Academy. Periodic Review applies to collaborative programmes, with the proviso that, where specified in the Memorandum of Agreement, the Periodic Review will follow the partner’s procedures. Wherever it makes academic sense Periodic Reviews are combined, for example the review for MSc Wild Animal Biology and MSc Wild Animal Health.
### Schedule of Periodic Reviews

The Periodic Review of a course normally takes place every six years. The following schedule of reviews is subject to change.
