## 1. Applies to cohort commencing in:
July 2018

## 2. Degree Granting Body
The University of London

## 3. Awarding institution
The Royal Veterinary College

## 4. Teaching institution
The Royal Veterinary College (University of London)

## 5. Programme accredited by
N/A

## 6. Name and title
Masters of Veterinary Medicine

## 7. Intermediate Awards
N/A

## 8. Course Management Team
Vicky Lipscomb (Course Director)
Dominic Barfield (Deputy Course Director)

## 9. FHEQ Level of Final Award

## 10. Date of First Intake
Monday 2nd July 2018

## 11. Frequency of Intake
Annually

## 12. Duration and Mode(s) of Study
156 weeks, full time

## 13. Registration Period (must be in line with the General Regulations for Study and Award)
<table>

## 14. Timing of Examination Board meetings
Annually

## 15. Date of Last Periodic Review
Validated January 2018

## 16. Date of Next Periodic Review
2023

## 17. Language of study and assessment
English

## 18. Entry Requirements
Hyperlink to definitive current entry requirements: https://www.rvc.ac.uk/about/the-rvc/academic-quality-regulations-procedures/programme-specifications

## 19. UCAS code
N/A

## 20. JACS Code (HECoS Code from circa 2016)
D200: Clinical Veterinary Medicine

## 21. Relevant QAA subject benchmark
N/A

## 22. Other External Reference Points
FHEQ level 7 (research and didactic modules); FHEQ level 8 and European Qualifications Framework (EQF) level 8 (clinical modules)
23. Aims of programme

The MVetMed programme aims to produce graduates that:

- Are able to satisfy the credentials requirements and pass the examinations of their European or American Veterinary Specialty Colleges.

- Have the relevant speciality specific experience and expertise in clinical veterinary medicine or veterinary pathology, including being able to demonstrate self-direction and originality in tackling and solving problems when appropriate.

- Demonstrate a systematic acquisition and understanding of a substantial body of knowledge which is at the forefront of their specialties discipline or area of professional practice.

- Are able to deal with complex clinical issues both systematically and creatively, make sound judgements, sometimes in the absence of complete information or in light of unforeseen problems, and communicate their conclusions clearly to specialist and non-specialist audiences.

- Are of the highest quality, with additional personal, communication, teaching and professional skills, poised to take up leading positions as veterinary clinicians or pathologists in academia worldwide, in private practice, or in industry, where they will continue to advance their specialty knowledge, skills and understanding.

- Can use the critical analysis skills and research experience they have developed during the programme to conduct clinical research projects, continue to publish in the veterinary literature, as well as continue lifelong learning and best practice of evidence based veterinary medicine in their clinical practice.

24. Overall Programme Level Learning Outcomes - the programme offers opportunities for students to achieve and demonstrate the following learning outcomes.

<table>
<thead>
<tr>
<th>Knowledge and understanding:</th>
<th>Methods in which each learning outcomes will be developed and assessed:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demonstrate academic study of clinical discipline to a level expected for a specialist as defined in the knowledge requirements of the specialty board.</td>
<td>Continuous formative assessment of case management (on a daily basis) by senior clinicians/pathologists</td>
</tr>
<tr>
<td>Draw on a diverse range of knowledge to critically evaluate and justify the rationale for clinical decisions within the context of specialist clinical practice.</td>
<td>Review by senior clinician/pathologist of owner and/or referring vet communication documents</td>
</tr>
<tr>
<td>Develop and apply knowledge of research conduct, scientific writing and clinical research methodology skills</td>
<td>Continuous assessment of participation in clinical/pathology rounds by senior clinicians/pathologists</td>
</tr>
<tr>
<td>Demonstrate understanding of ethical and welfare issues relating to clinical practice, teaching and research</td>
<td>Assessment of contributions to graduate seminars by senior clinicians/pathologists on a weekly basis</td>
</tr>
</tbody>
</table>
### Cognitive (thinking) skills:
- Critically examine and apply the evidence base relating to specialty area of clinical practice, demonstrating the synthesis of theoretical knowledge and understanding in relation to specialist clinical practice.
- Awareness of new developments in specialty, demonstrating innovation in the application of knowledge to practice.
- Apply a critical approach to research project design and implementation, with confidence in statistical analysis of data.
- Reflect critically and constructively on clinical and professional role, taking responsibility for personal and professional learning and development.

### Practical skills and Abilities:
- Proficiency in dealing with complex clinical cases under supervision, with increasing autonomy, using problem-solving, decision-making and practical skills.
- Demonstrate excellent communication, organizational, teamwork and interpersonal skills.
- Develop and use oral presentation skills to deliver journal clubs, lectures, seminars, research abstracts, and ad hoc small group student teaching.
- Develop and use information technology skills to support learning, practice and research activities.

<table>
<thead>
<tr>
<th>25. Teaching/learning methods</th>

</tr>
</thead>
<tbody>
<tr>
<td>Participation in:</td>
<td>&gt;300 hours per year of direct clinical supervisor contact for 3 years</td>
</tr>
<tr>
<td>Management of clinical cases under supervision</td>
<td></td>
</tr>
<tr>
<td>Clinical rounds</td>
<td></td>
</tr>
<tr>
<td>Speciality resident rounds</td>
<td></td>
</tr>
<tr>
<td>-------------------------------------------------</td>
<td>----------------------------------</td>
</tr>
</tbody>
</table>
- Three taught sessions in year 1 (lectures, DL) on evidence based medicine and critical appraisal of articles
- Critical assessment of the literature in speciality journal/book clubs with self study to read and prepare for journal clubs
- Friday morning seminars (Small Animal and Equine)

Design, implementation and writing up an original research project for publication via self directed research study time at all times under the guidance of face to face meetings with research supervisor
- Taught research skills courses (lectures) with formative assignments (statistics, scientific writing, digital literacy)

<table>
<thead>
<tr>
<th>150hrs per year for 3 years</th>
<th>400 hrs over 3 years</th>

</thead>
<tbody>
<tr>
<td>50hrs over 2 years</td>
<td></td>
</tr>
</tbody>
</table>

### 26. Assessment methods

**Research module** – summative to be completed by 1<sup>st</sup> April of third year:

- Research project poster OR oral presentation (at RVC or external meeting)
- Submission of research project written in the format of a paper suitable for publication in a peer-reviewed journal, word count <5000, without corrections from external journal reviewers therefore submitted to exams office at the time of submission to a journal or by 1<sup>st</sup> April of third year if not yet submitted to a journal.
- Oral defence of this research project

**Didactic module** will be assessed formatively (1<sup>st</sup> year) and summatively (2<sup>nd</sup> and 3<sup>rd</sup> year) by 1<sup>st</sup> May each year:

- 1hr on-line MCQ exam in the format of the specialty board examination (covering material in the previous 12-month didactic module)
- 45 mins critical article(s) appraisal oral presentation

<table>
<thead>
<tr>
<th>Percentage of total assessment load for individual module</th>
</tr>
</thead>
<tbody>
<tr>
<td>10%</td>
</tr>
<tr>
<td>80%</td>
</tr>
<tr>
<td>10%</td>
</tr>
</tbody>
</table>

---

50% 2<sup>nd</sup> year and 50% 3<sup>rd</sup> year

Pass/fail 2<sup>nd</sup> year and 3<sup>rd</sup> year
Each clinical module (1, 2 & 3) will be assessed summatively by 1st May each year:

Four WPBA, consisting of:
1 x mini clinical evaluation exercise (MiniCEX) OR 1 x Case Based Discussion (CbD)
And 3 x of: MiniCEX OR CbD OR Direct Observation of Practical Skills (DOPS)
2 x Multi Source Feedback (MSF)

Pass/Fail
Pass/Fail
Pass/Fail

27. Feedback

Students will be given feedback throughout the course, including:

- Continuous daily feedback of case management and participation in clinical rounds, by senior clinicians/ pathologists and peers (formative for WPBA & MSF)
- Continuous weekly feedback of participation in journal clubs and other oral presentations by senior clinicians/ pathologists and peers (formative for summative oral presentations)
- Regular formative feedback from research supervisor during face to face meetings on research project progress
- End of year 1st year didactic module MCQ examination and oral presentation will be formatively assessed as practice for the 2nd and 3rd year summative didactic module MCQ examination and oral presentation assessments.
- Formative assessments of written assignments for the taught component of the research module will be given with verbal and/or written feedback
- SCTS will be given feedback for all WPBA which are summative assessments (assessing competency) that are repeated so the feedback for one is in itself formative for the next summative assessment
- Multisource 360 feedback is a summative assessment that is repeated so the feedback for one is in itself formative for the next summative assessment
