1. Introduction and Purpose

- 1.1. The purpose of this procedure is to ensure that there is a systematic collection of student, graduate, and employer views on the education which the Royal Veterinary College (RVC) provides, and that this data is used to enhance the quality of educational provision and students learning experience. It seeks to fulfil the expectation relating to student engagement as set out in the Office for Students ongoing conditions of registration and the UK Quality Code for Higher Education, Quality Assurance Agency.

2. Scope

- 2.1. This procedure covers all RVC based taught programmes of study including those taught at a distance, both undergraduate and postgraduate. It does not cover research degrees or non-award bearing continuing education.
- 2.2. Annual reports summarising the student and employer survey results will be submitted to the Teaching Quality Committee for oversight and consideration.

3. General Principles

- 3.1. Annual reports summarising the student, graduate and employer survey results will be submitted to the Teaching Quality Committee (TQC) for oversight and consideration and then in some cases disseminated to other groups who produce actions plans to address findings (External Student Surveys working groups; Careers Steering groups). The report should include survey data including themes from open comments aligned with its role to identify cross course issues and good practice.
- 3.2. The Student Resolution and Compliance (SRC) Team are responsible for making sure the TQC chair and Head of Department have access to all survey results using a shared protected platform.
- 3.3. The Student Resolution and Compliance (SRC) Team facilitates and administratively manages all activities and tasks related to internal and external student surveys. More information on the main responsibilities and where SRC resides within the Academic Registry structure can be found on the [Student Resolution and Compliance](#) intranet section.

4. Student Engagement and Surveys Working Groups

4.1. 'Student Engagement in Quality Enhancement' working group

- 4.1.1. The 'Student Engagement in Quality Enhancement' working group (SEQEWG) operates as a sub-group of the Teaching Quality Committee (TQC). It supports the delivery of the RVC's 'Strategy for Enhancement and Assurance of the Quality of Learning, Teaching and Assessment' and the 'Student Voice Strategy' to:
 - Create, review, refine and promote a range of opportunities for students to engage in dialogue with the RVC to assure and enhance the quality of their learning.
 - Develop effective processes for the administration of all student surveys, ensuring ease of access for students and staff (including undergraduate/ postgraduate).
 - Promote and enable effective "closing of the loop" on quality assurance and enhancement activities, including administering and advising on processes for publishing and disseminating timely responses to student survey feedback.

- Recommend to the TQC policy and procedures governing student engagement in quality enhancement activities.
 - Identify opportunities to disseminate information about student representation and engagement activities to both staff and students.
- 4.1.2. The approval of the working group must be sought for proposals relating to the administration of any course wide student surveys. (To note: approval is not needed for Student Panel activities)
- 4.1.3. Membership includes: TQC Chair (Chair), Student Participation Manager, Student Participation Officer, Course Directors for BVetMed; Undergraduate BioSciences; FdSc and BSc Veterinary Nursing; Certificates in Advanced Veterinary Nursing, Vice Principal Students, SU Vice President for Representation and Communications, SU Postgraduate Officer, PSD Directors and other course staff as required. Further information relating to this working group can be found in the [RVC's 'Academic Committee Handbook'](#).
- 4.2. 'External Student Surveys' working group**
- 4.2.1. The 'External Student Surveys' working group (ESSWG) operates as a sub-group of TQC who will receive its minutes. The group considers the results of two externally conducted satisfaction surveys, run annually – the National Student Survey (NSS) and the Postgraduate Taught Experience Survey (PTES). The group also considers the results of the externally conducted Barometer Survey 'Learning' section results (see section 21 in this procedure).
- 4.2.2. The group reports its conclusions and recommendations to the Academic Board, via the Teaching Quality Committee. The working group meets at the beginning of the autumn term to provide Course Directors/Year Leaders with its conclusions/recommendations and actions being taken at an RVC wide level in advance of the submission of their 'Annual Quality Improvement Reports'. Further information relating to this working group can be found in the [RVC's 'Academic Committee Handbook'](#).
- 4.2.3. Dashboards which track the annual survey results for the NSS, PTES, PRES (Postgraduate Research Experience Survey) and Student Barometer can be accessed from the Student Survey area in the [Student Voice section of RVC LEARN](#).
- 4.2.4. Based on discussions held at the working groups Autumn meetings, the Vice Principal for Students and the Vice Principal for Learning, Teaching and Assessment, will draft an RVC institutional statement responding to the survey results. The statement will be drafted by the Vice Principals in consultation with the RVCs 'College Executive Committee'.
- 4.2.5. The final statement will be approved by the following committees in the Autumn and published in the [Student Voice section of RVC LEARN](#) by the Student Resolution and Compliance Team.
- 4.2.6. Approving committees:
- Learning, Teaching and Assessment
 - Student Development Committee
 - Academic Board
- 4.2.7. The statement will be published annually by the end of December to ensure it can be used to inform the development of Course Directors 'Annual Quality Improvement Reports'.

5. Responding to Student Survey Results

- 5.1. Annual Module/Strand/Rotation Reviews are used to document any necessary future changes to the delivery of content, things that went well and not as well as hoped, and to share good teaching practice (see Programme Management procedure '[Reviews of Modules, Strands, Intra-Mural Rotations, Research Project 2 and the TLiHE course](#)').
- 5.2. The Module/Strand/Rotation Leader should submit the Module/Strand/Rotation Review form within 20 working days of the Module/Strand/Rotation teaching finishing.
- 5.3. The reviews should demonstrate consideration of student feedback received by whatever available means e.g. from results of student surveys provided by SRC from academic committee meetings, as reported by SU Course Representatives etc, and any actions arising from their feedback should be clearly outlined. This may include detailing changes to the course as a result of the feedback or actions supporting communications to students about changes that will not be made or, to provide explanation or clarity where no change is possible.
- 5.4. Module/Strand/Rotation Leaders are asked to ensure that their reviews are completed in a timely fashion and to engage with the relevant Year Leader/Course Director/Rotations Director as required to discuss any issues raised within the student's feedback.
- 5.5. Year Leaders (and where they do not exist, the Course Directors) are required to publish a 'Reflective Response' for their cohort at the end of each term on LEARN, to consider and respond to student feedback as appropriate for their cohort. This student feedback could be received via SU Course Representative, module/strand surveys, Q&A sessions, forums and any other informal routes.
- 5.6. The Reflective Response should be drafted in consultation with staff teaching the cohort. The Reflective Response should be published as a 'course announcement' on the LEARN homepage for the Course/Year group.
- 5.7. Students should be signposted to the Reflective Response wherever possible, and it should be emailed to SU Course Representatives for the cohort. Where possible the Course Director/Year Leader should brief the year group on the response through a timetabled session in partnership with the RVCSU Course Representatives.
- 5.8. Course Directors and Year Leaders will continue to provide an annual response to the results of relevant student satisfaction surveys through the completion of their 'Annual Quality Improvement Report'.

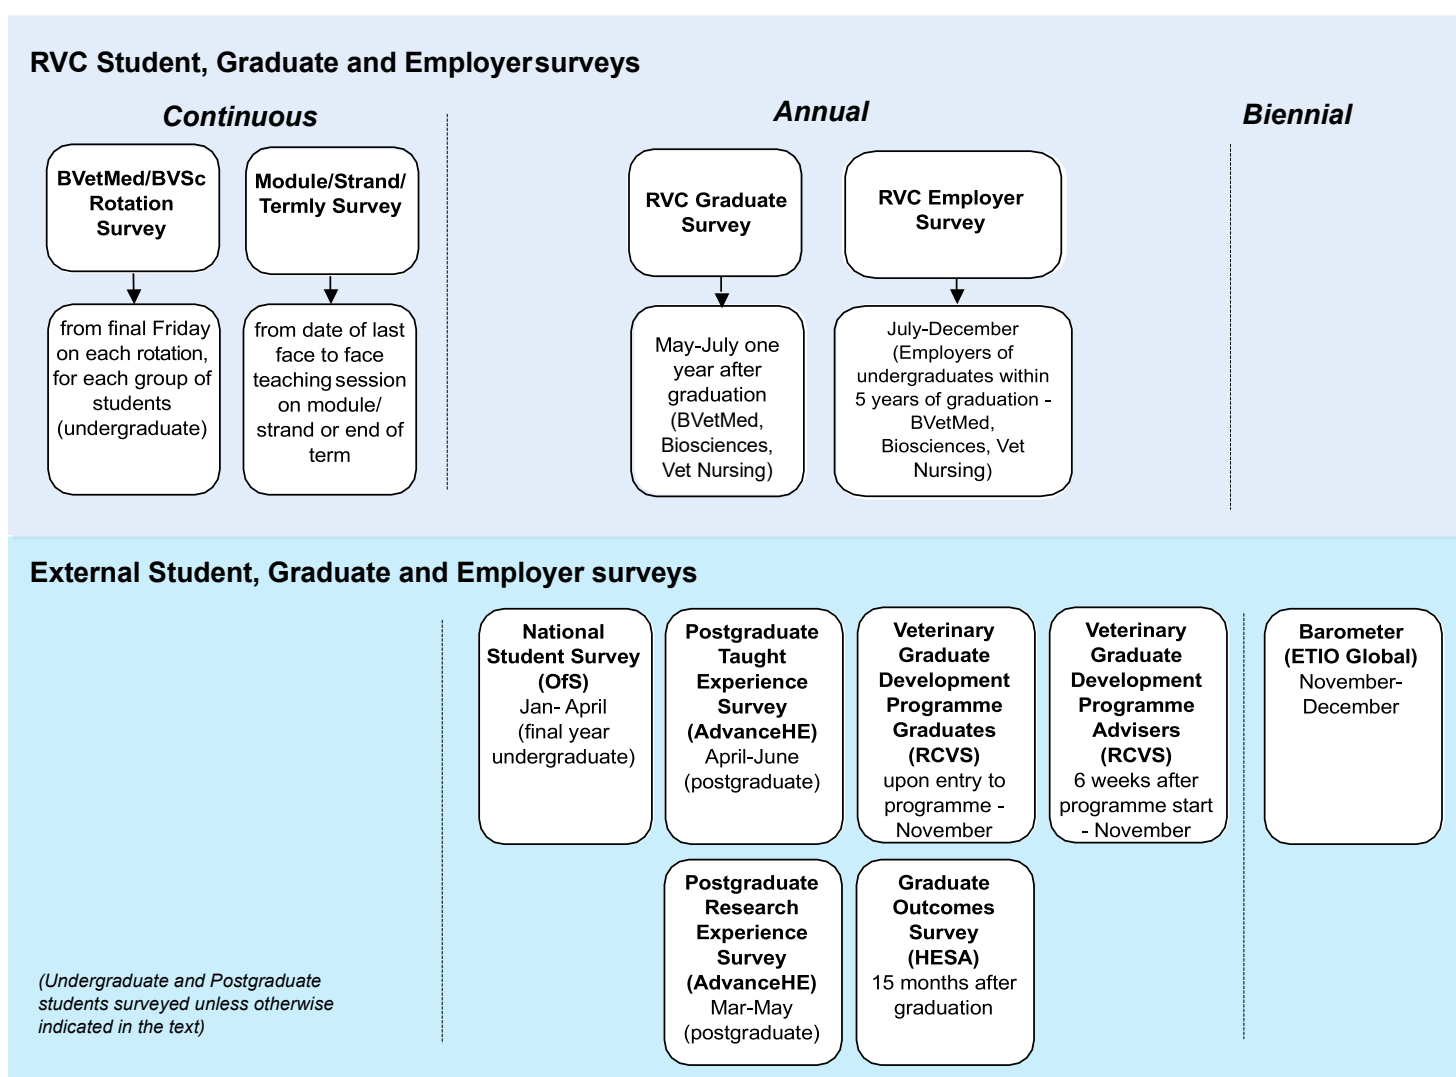

6. You Said... We Did...

- 6.1. 'You Said...We Did...' aims to close the feedback loop by reporting actions taken and responses made to feedback from students, including student evaluation results and feedback from student representatives. The project is overseen by the SRC team, is part of the Student Voice Strategy and championed by the Vice Principal (Students).
- 6.2. 'You Said...We Did...' items are published in the [Student Voice section of RVC LEARN](#) and advertised to students via LEARN course announcements.
- 6.3. The identification and submission of new entries are encouraged from staff and students. Entries can be submitted directly to the SRC Student Participation section at studentparticipation@rvc.ac.uk or via the standing agenda item of the relevant Academic Committee.

7. RVC Student Surveys Principles

- 7.1. Student opinion is gathered by a variety of means, including through the RVC SU Course Representative system and informal staff/student discussions. In addition, surveys are commended as an effective means of gathering systematic and comparable data if used at appropriate intervals and the results are given consideration and responded to.
- 7.2. The RVC conducts internal surveys which enable students to give feedback on individual Modules/Strands/Rotations. In addition, undergraduate students are able to feedback on their overall RVC experience, both academic and otherwise one year after graduation through the 'RVC Graduate survey'. See Figure 1 below
- 7.3. The RVC participates in national external surveys which enable students to give feedback on their overall experience at the RVC, both academic and otherwise. See Figure 1 below.
- 7.4. All RVC student surveys are anonymous, and no student will be identifiable from any results or reports produced. To protect anonymity and ensure valid results a minimum of three respondents are required to administer and analyse a survey.

Figure 1. RVC Student, Graduate and Employer Surveys

8. Internal Module, Strand and Termly Survey Process

- 8.1. Modules and Strands are evaluated either through an end of teaching survey, or a termly survey.
- 8.2. Termly surveys were introduced in the 2025-26 academic year for the following programmes: BVetMed/BVSc Years 1-4 (not Intra Mural Rotations); Undergraduate Biosciences Years 1-4; Undergraduate Veterinary Nursing Years 1-4; BSc Comparative Pathology 1-year programme.
- The first section of the survey consists of one overall satisfaction question, followed by a series of quantitative 'scale' questions selected by the relevant course director and/or year leader.
 - The next section contains a series of qualitative 'open comment' questions defined by the specific modules or strands taking place that term.
 - Termly surveys take place at the end of each of the three terms, open for a total of 20 calendar days (typically 15 days before the end of term and 5 days after) as agreed with the course director and/or year leader.
- 8.3. The following programmes participate in end of module surveys, which take place at the end of each teaching module each term: MSc One Health; MSc Vet Epidemiology; MSc Wild Animal Biology; PG Dip, PG Cert and MSc Veterinary Education; Graduate and Postgraduate Cert Advanced Veterinary Nursing.
- End of module surveys consist of one overall satisfaction question, followed by two standard qualitative open comment questions.
 - The survey typically takes place following the final face to face teaching session for the given module, open for a total of 20 calendar days, as agreed with the course director and/or year leader.
- 8.4. Internal surveys are administered through the RVC's online survey system (OSS). On the start date of the survey students will receive an email invitation around 9am from noreply@rvc.ac.uk containing a link to the survey. Students can also access the survey system via their LEARN course homepage and QR code.
- 8.5. The SRC team aim to process survey results within a week of the closing date.

9. Other Internal Atypical Survey Process

- 9.1 Other programmes are surveyed at different points in the year, as agreed with the course director and/or year leader.
- 9.2 University of London (UoL) Distance Learning programmes are surveyed annually between August and October, as agreed with the course director. These surveys are typically open for 20 days and take place via the RVC's OSS.
- 9.3 Cert Advanced Veterinary Practice (Cert AVP) surveys take place for each module and are open for the duration of the year (Jan-December). Students are invited to complete the

survey after completion of the relevant module. The results are considered collectively at the end of the 12-month period. These surveys take place via the JISC platform.

9.4 RVC Bioscience students who take optional modules at Kings College London (KCL) are surveyed at the end of each relevant term. These surveys are typically open for 20 days and take place via the RVC's OSS.

9.5 Students participating in the TLIHE (teaching and learning in higher education) programme are invited to complete a survey upon completion of the programme. The survey is open for the duration of the year (Jan-Dec), and relevant students are sent a link when they have completed the programme. The results are considered collectively at the end of 12-month period. These surveys take place via the JISC platform.

9.6 BVetMed/BVSc final year students participating in their Research Project (RP2) are sent a survey after their hand-in deadline. These surveys are typically open for 20 days and take place via the RVC's OSS.

9.7 PG Dip Veterinary Clinical Practice (Interns) participate in one survey either mid-way through or at the end of the 1-year programme, as agreed with the course director. The survey is typically open for 20 days and take place via the JISC platform.

9.8 MVetMed (Residents) participate in one survey at the end of each year (Years 1-3). The survey is typically open for 20 days and take place via the RVC's OSS.

9.9 Certificate in Advanced Veterinary Nursing students complete an end of course survey, following completion of their final exams. This is typically open for 1 month, as agreed with the course director, and takes place via the JISC platform.

9.10 The SRC Team aim to process survey results within a week of the closing date.

10. BVetMed/BVSc Intra-Mural Rotation Survey Process

10.1. At the end of each rotation, BVetMed/BVSc students are invited to provide an overall evaluation of the rotation and to complete a full survey to provide further details.

10.2. Surveys are administered through the RVC's OSS and are normally issued on the last Friday of a rotation.

10.3. On the survey live date students receive an email at around 9:00am from noreply@rvc.ac.uk containing a link to the survey. Students can also access surveys via the navigation menu on their LEARN course homepage and via QR code.

10.4. Rotation Surveys contain two parts:

- Overall satisfaction question – respondents are asked to provide an overall evaluation of the rotation as either 'satisfied' or 'dissatisfied'.
- Full survey – respondents are asked to provide a response to specific quantitative questions, and expand on any answers via a qualitative 'open comment' question.

- 10.5. Rotation surveys usually remain open for 10 calendar days.
- 10.6. For core rotations, survey results are collated and reviewed roughly every 6 weeks (to coincide with the end of each 6-week rotation block). For track rotations, survey results are collated and reviewed roughly every 3 months.
- 10.7. BVetMed/BVSc Intra-Mural Rotations are also evaluated by means of a 'Rotation Feedback Forum' held twice per annum, once mid-year and once after the rotation cycle has ended. Students are invited to attend in-person and give an evaluation on this part of the BVetMed / BVSc course alongside key course staff.

11. BVetMed/BVSc Student Elective Survey Process

- 11.1. Electives teaching conducted with BVetMed / BVSc Year 5 students is evaluated annually. A standard survey is issued by the Teaching Quality Committee and is administered through the RVC's online survey system. The survey is normally issued on the date of the last face to face teaching session on electives. On the survey live date students receive an email at around 9:00am from noreply@rvc.ac.uk containing a link to the survey. Students can also access surveys via the dashboard page of LEARN.
- 11.2. The elective survey contains two parts:
- Overall satisfaction question – respondents are asked to provide an overall evaluation of electives as either: very satisfied/satisfied/dissatisfied/very dissatisfied.
 - Full survey – respondents are asked to provide a response to two open comment questions.
- 11.3. The Student Electives survey usually remains open for 20 calendar days. The SRC team aim to process survey results within a week of the survey closing date.
- 11.4. The Electives Director is required to respond to the results of the Staff and Student Electives survey through their Electives 'Annual Quality Improvement Report'.

12. BVetMed/BVSc Staff Electives Survey Process

- 12.1. Electives teaching conducted with BVetMed/BVSc Year 5 students is evaluated annually. A standard survey is issued by the Teaching Quality Committee to all staff involved in delivering electives teaching. The survey is normally issued once all teaching on electives has been completed, as agreed with the Electives Director.
- 12.2. The Staff Electives survey usually remains open 10 calendar days. The SRC Team aim to process survey results within a week of the survey closing date.

13. RVC Graduate Survey Process

13.1. Graduate surveys are conducted online annually:

- Between May-July with the cohort of students who completed their studies on the BVetMed/BVSc, BSc/MSci Biosciences, FdSc/BSc Veterinary Nursing in the preceding academic year.
- Between May-July with students who completed their Certificate in Advanced Veterinary Nursing during the current academic year (completed in the previous October)

13.2. A response rate of below 25% and/or less than 3 students is considered low and consequently no analysis of low scores will be conducted.

13.3. Low scores are defined as any quantitative question where 50% or above respond 'mostly disagree'/'definitely disagree'.

13.4 Questions are agreed with the relevant course director annually, and ask a series of quantitative and qualitative questions to collect feedback on student experience and preparation for life post-graduation.

13.5. During the Autumn term the results are considered by the Careers Steering Working Group which reports to the Student Development Committee.

13.6. The relevant Course Director(s)/Year Leader(s) respond to any low scores through their completion of the standard Annual Quality Improvement Report. Their responses to these surveys will then be approved by the TQCs' 'Annual Quality Improvement Group' (see Academic Registry Procedure for 'Monitoring and Review of Courses').

14. RVC Employer Survey Process

14.1. An Employer survey is conducted online annually between July-December with employers of RVC Graduates who left the RVC within the last 5 years, and who graduated with the following degree: BVetMed/BVSc, BSc/MSci Biosciences, FdSc/BSc Veterinary Nursing, Graduate and Postgraduate Certificate in Advanced Veterinary Nursing.

14.2. Various sources of employee contact details will be utilised in order to distribute the 'RVC Employer Survey'; and to invite responses from employers:

- RVC Graduate survey - Graduates are asked to provide the contact details of their employer through completion of the 'RVC Graduate survey'.
- RVC Continuing Professional Development team – list of UK veterinary practices who have consented to receive RVC communications.
- RVC Clinical Services (Beaumont, QMHA, Boltons Farm and Acorn House)
- Attendance at London Vet Show annually.

14.3. During the subsequent Spring term the results are considered by the relevant Course Director(s)/Year Leader(s) and low scores are responded to through their completion of the standard Annual Quality Improvement Report in the following Autumn term.

- 14.4. The responses to these surveys will then be approved by the TQCs' 'Annual Quality Improvement Group' (see Academic Registry procedure for 'Reviews of modules, TLIHE and BVetMed: Strands/Rotations/Electives and Research Project 2').

15. Survey Results Process

- 15.1. Low scoring questions are defined as:

- Overall satisfaction question – 79% or below responded as either 'very satisfied' or 'satisfied' (as a % of total respondents).
- Full survey – where quantitative questions are included, the question with a median of 2 or below will be considered a low score. If the overall median is 4 this will normally be considered excellent.
- The current guideline flags it as low scoring only if less than 79% are satisfied and there are at least 20 responses to the survey.

- 15.2. A response rate below 25% and/or less than 3 students is considered low; consequently, no analysis of the results of any quantitative questions will be conducted.

- 15.3. The Student Resolution and Compliance Team will draw to the attention of staff (as outlined in section 5) who are recipients of the survey results, any instances of low response rates/low scoring questions.

- 15.4. The relevant course lead is required to respond to the results of the survey, particularly any low scores for the 'overall satisfaction question' through an independent review.

- 15.5. In the case of any low scoring questions, the response provided in the review will be considered by the Teaching Quality Committee.

- 15.6. Survey results are returned to the relevant course leads, for example:

- Course Director and Deputy Course Director
- Year Leader and/or Rotation Leader
- Module/Strand Leader and/or Deputy Module/Strand Leader
- Electives Director (Staff and Student Electives Survey)
- Student Course Representatives for the appropriate year
- Programme Administrator

- 15.7. The results of the surveys which meet the response rate threshold, are published on RVC LEARN in the Student Voice section (excluding open comments). RVCSU Course Representatives are encouraged to direct their year group to the results as published on the intranet. They are also encouraged to discuss the results with the relevant course lead.

- 15.8. Summaries of survey results will be retained by the Student Resolution and Compliance team in a form such that they can be used in appraisal and offered as evidence in promotion applications, institutional audits, quality assessments and accreditation.

16. External Student Surveys Process

- 16.1. The RVC normally takes part in national student satisfaction surveys to enable both current and future students to compare the University with other institutions. These include the National Student Survey, Postgraduate Taught Experience Survey, Postgraduate Research Experience Survey and the Barometer Survey.

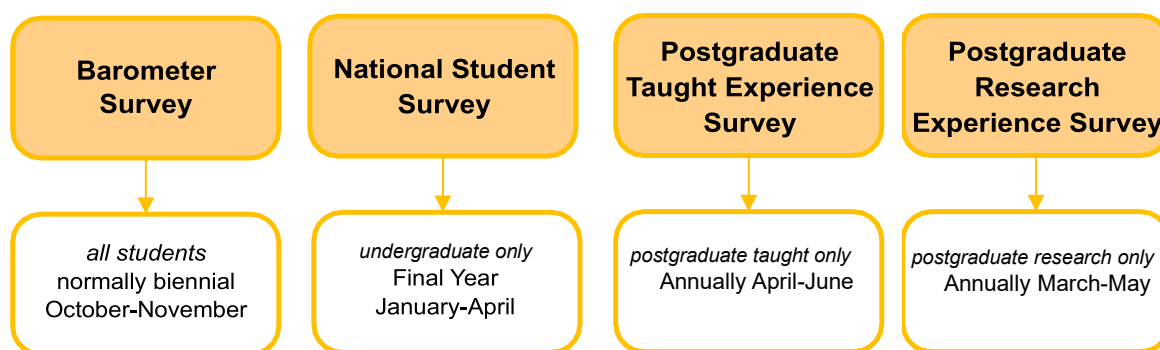

Fig 2: External Student Surveys

16.2. External survey results are published in the [Student Voice area on LEARN](#) in the [data dashboards](#) to show year-on year trends.

17. National Student Survey (NSS)

17.1. The NSS is managed by the Office for Students (OfS). It is conducted annually between January and April by Ipsos MORI. Students are surveyed in their final year of BSc and MSci Biosciences; BVetMed/BVSc; FdSc and BSc Veterinary Nursing.

17.2. The results of the NSS are published in July. The quantitative and qualitative data are collated and analysed according to the course by the SRC team. Quantitative data is reported via the [RVC's PowerBI results dashboard](#). Qualitative data is analysed and organised under key themes.

17.3. During the Autumn term the results are considered and University-wide themes identified by the External Student Surveys Results Working Group. Subsequently, relevant Course Directors respond to low scores through their completion of the standard Annual Quality Improvement Report. Their response to the survey is approved by the TQCs' 'Annual Quality Improvement Group' (see Academic Registry Procedure for 'Annual Quality Improvement Reporting process').

17.4. Members of staff will utilise 'You Said...We Did...' to report feedback regarding progress against their actions.

18. Postgraduate Taught Experience Survey (PTES)

18.1. The RVC participates in the annual Postgraduate Taught Experience Survey (PTES) which is run by the Advance HE together with the RVC.

18.2. The survey gathers views from postgraduate students on a number of areas including their experience of learning and teaching, supervision, infrastructure, skills and personal development and professional and career development. The survey aims to identify areas where further enhancements can be made to programmes.

18.3. All postgraduate taught students are contacted annually via email between April and June and asked to complete an online survey, which is run via the JISC survey platform.

- Postgraduate taught programmes invited to complete the PTES: MSc One Health; MSc Vet Epidemiology; MSc Wild Animal Biology/Health; Certificate in Advanced

Veterinary Nursing; MSc, PG Dip and PG Cert Veterinary Education; PG Cert Veterinary Clinical Studies; MVetMed (Residents); PG Dip Veterinary Clinical Practice (Interns).

- 18.4. During the Autumn term the results are considered and University-wide themes identified by the External Student Surveys Results Working Group. Subsequently, the relevant Course Director(s) respond to low scores through their completion of the standard Annual Quality Improvement Report. Their responses to the survey are approved by the TQCs' 'Annual Quality Improvement Group' (see Programme Management procedure for 'Reviews of modules, TLiHE and BVetMed: Strands/Rotations/ Electives and Research Project 2').

19. Postgraduate Research Experience Survey (PRES)

- 19.1. The RVC participates in the annual Postgraduate Research Experience Survey (PRES) which is run by Advance HE together with the RVC.
- 19.2. The survey gathers views from postgraduate research students on a number of areas including their experience of learning and teaching, supervision, infrastructure, skills and personal development and professional and career development. The survey aims to identify areas where further enhancements can be made.
- 19.3. All postgraduate research students are contacted annually via email between March and May and asked to complete an online survey, which is run via the JISC survey platform.
- Postgraduate Research programmes invited to complete the PRES: PhD, MPhil, MRes, Prof Doc.
- 19.4. During the Autumn term the results are considered and University-wide themes identified by the Research Degrees Committee in order to identify issues and required responses/actions to be taken.

20. Graduate Outcomes Survey

- 20.1. The Graduate Outcomes survey is a national survey which captures the perspectives and current status of graduates. All graduates who completed a higher education course in the UK after August 2017 will be asked to take part in the survey 15 months after they finish their studies.
- 20.2. The survey is delivered by HESA (Higher Education Statistics Agency). HESA has delivered a survey of graduates since 1994/95 under the name of Destination of Leavers from Higher Education (DLHE). DLHE captured the 'destinations' (what graduates did after education) of millions of graduates over the years. In 2016, HESA carried out a full review and as a result, created the Graduate Outcomes survey.
- 20.3. During the Autumn term, the results are considered by the Careers Steering Working Group which reports to the Student Development Committee.
- 20.4. The results of the survey are shared with Course Directors using the [Careers Insights Reports](#) for completion of their 'Annual Quality Improvement Reports' (see Academic Registry Procedure for 'Annual Quality Improvement Reporting'). The Careers Insights report and associated dashboards are [published annually on the intranet](#). The responses to these surveys will then be approved by the TQCs' 'Annual Quality Improvement Group' (see Academic Registry Procedure for 'Monitoring and Review of Courses').

21. Barometer Survey

- 21.1. The RVC participates in the Barometer Survey on an ad-hoc basis as decided by the Teaching Quality Committee. The Barometer Survey is run by research company ETIO Global. Typically, the RVC participates in the survey every two years in the Autumn Term, between October and November.
- 21.2. The survey gathers views from all students, both international and domestic, on a number of areas including their experience of pre-arrival at the RVC, induction, teaching and learning, living and student support.
- 21.3. The results published in the [Student Voice area of LEARN](#) and are considered by RVC Student Development Committee, responsible for student support services, in order to identify any college wide issues and required responses/actions to be taken.
- 21.4. The results of the Barometer survey 'Learning' section are considered by the External Student Surveys working group, and the results are reported by way of the minutes to TQC and Academic Board. The results of the survey 'Learning' section are shared with Course Directors for completion of their 'Annual Quality Improvement Reports' (see Academic Registry Procedure for 'Annual Quality Improvement Reporting').

22. RVC Suggestion Box

- 22.1. The RVC invites all students to share their feedback via a suggestion box. There are multiple ways in which students can utilise the suggestion box:
 - Online: suggestions can be submitted through the online suggestion box (housed on Google Forms) accessible through scanning a QR code.
 - In-person: suggestions can be submitted at the physical suggestion box located at the Camden and Hawkshead Academic Registry Helpdesks.
- 22.2. Students are able to provide feedback on areas of success, areas for improvement, and feedback on how the BVetMed, BVSc, Biosciences or Veterinary Nurse programmes meet accreditation standards.
- 22.3. Feedback is reviewed by the SRC team and circulated to the relevant departments and teams as necessary for further consideration or action. Feedback can then be discussed and responded to through the relevant committee or working group meeting as necessary.
- 22.4. The SRC team will incorporate relevant student feedback regarding areas of success and opportunities for improvement in relation to meeting accreditation standards, as part of the RCVS annual monitoring report.
