23. Aims of programme

A concise, overall statement of the educational purposes of the programme. E.g.

| The Professional Doctorate in Veterinary Practice aims to offer veterinary employed professionals with the opportunity to develop their professional roles and to implement an independent programme of research within the workplace. The Professional Doctorate in Veterinary Practice programme is structured to deliver the opportunity to acquire advanced research skills and taught knowledge, with the central concept of "critical professionalism". The course offers opportunities for candidates to achieve and demonstrate the following learning outcomes: Critical evaluation and dissemination of information from a variety of sources to develop understanding and make decisions Collaboration with experts and policy makers across a wide range of disciplines and organisations Designing and executing an independent research project or portfolio of research Effective and scientifically rigorous communication of scientific information and experimental conclusions in oral and written formats Managing human, financial and physical resources as appropriate to achieve project aims Monitoring of own learning and development to identify learning needs and to plan and manage their acquisition Reflective and self-critical approach to research and professional development Professional and intellectual skills to deliver leadership, inspiration and motivation of others | | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| students to achieve and demonstrate the folloshould be specified for all intermediate awardsE.g. On successful completion of the | | | |
| Postgraduate Diploma course, students will be able to: | developed and assessed: | | |
| Knowledge and Understanding of: Advanced concepts and techniques in scientific disciplines relevant to the veterinary industry Background scientific, technical, commercial and policy literature Theory and practice of research methods and study design, and related ethical and governance framework Project planning and management Advanced research and related methods in applied veterinary research and professional practice Current professional developments within their field of work | Teaching/learning methods: Students acquire knowledge and understanding through participation in: Online interactive learning Message forums/bulletin boards Professional experiences Reflection on course materials and related research findings Self-directed and independent study, supported by the 'RVC Learn' virtual learning environment Assessment by: In-course assignments Written and oral examinations Organisation-focused study Research thesis | | |

| Cognitive Skills: Think logically and evaluate critically research and advanced scholarship in the discipline in order to challenge current concepts and approaches and, where appropriate, propose new hypotheses Formulate questions, critically appraise, synthesise and evaluate evidence so as to transfer knowledge into practice Plan and implement tasks at a professional level to solve problems related to their discipline Critically evaluate methodologies with respect to a plan of investigation and demonstrate awareness of any constraints or limitations Plan, conduct and write a doctoral thesis on an independent research project Relate systematic evidence to issues arising in professional practice | Teaching/learning methods: Students acquire knowledge and understanding through participation in: Online interactive learning Reflection on course materials and related research findings Research planning, participation and interpretation Self-directed and independent study, supported by the 'RVC Learn' virtual learning environment Assessment by: In-course assignments Written and oral examinations Organisation-focused study Research thesis |
