**Most common coat colours**

**Top 10 most common specific disorders in Boxers in 2016**

**Most commonly diagnosed specific disorders**

**Most commonly diagnosed disorder groups**

**Most common causes of death**

**Conclusions**

---

This study aimed to describe the demography, mortality and common disorders of Boxer dogs under primary veterinary care in the UK. The study used information from anonymised veterinary clinical records in the VetCompass™ Programme. The annual proportion of Boxers using information from the VetCompass™ Programme was 0.96% of 336,865 UK dogs.

**Percentage of dogs diagnosed in 2016**

**Top 6 most common causes of death in Boxers in 2016**

**Conclusions**
