GI (Gingivitis Index)
 0 = Normal
 1 = Marginal gingivitis
 2 = Some swelling/bleeds on probing
 3 = Marked swelling/bleeds easily

CI (Calculus Index)
 0 = No calculus
 1 = Some supragingival/small amount below gingival margin
 2 = Moderate calculus supra and subgingival
 3 = Abundant calculus supra and subgingival

PI (Plaque Index)
 0 = No plaque
 1 = Thin film gingival margin
 2 = Moderate accumulation of plaque in sulcus
 3 = Abundant soft material in sulcus

Neck Lesions (FORL's)
 Class 1 = 0.5mm lesion in enamel
 " 2 = penetration into dentine
 " 3 = penetration into pulp
 " 4 = major destruction of tooth
 " 5 = crown lost/roots retained

CODE KEY

■ Missing Tooth	# Fractured Tooth	GH Gingival Hyperplasia	RT Retained Temporary Tooth
X Extracted Tooth	CA (class) Carious Lesion	R Restoration (Rc, Ri or Ra)	M Mobile Tooth
P (mm) Periodontal Pocket	F Furcation Exposure (F1, F2, F3)	ED Enamel Defect	0 = Normal 2 = Moderate
	GR Gingival Recession	3*D Tertiary Dentine	1 = Slight 3 = Severe
	(- indicates exact buccal location)
